

**ANNUAL WATERWORKS INFORMATION AVAILABLE AT THE MUNICIPAL OFFICE BY SEPTEMBER 1 OF EACH YEAR** *(As required under The Municipalities Regulations)*

<b>Name of Municipality</b>	TOWN OF DELISLE
-----------------------------	-----------------

<b>Date</b>	September 1, 2011
-------------	-------------------

**WATERWORKS RATE POLICY**

On August 16, 2011, Council passed a resolution on a waterworks rate policy.

*(Describe the waterworks rates and fees charged by the municipality, including the price per unit.)*

Under the waterworks rate policy, the quarterly base rate has recently increased to \$54.00 for the first 6,000 gallons of water plus an additional \$4.00 for every 1,000 gallons consumed over the first 6,000 gallons. This rate just took effect February 15, 2011. The base rate will increase by a \$2.00/month on February 15, 2012. These rates were established in Bylaw No. 1-2010 passed on April 13, 2010. Council is also considering increasing the excess water rate by \$1.00/1,000 gallons in 2013. Council annually reviews the water and sewer rates and will, at the very least, take inflationary factors into account to ensure water and sewer revenues cover water and sewer expenses. Other than years where extraordinary capital expenditures have taken place, operating revenues have always covered operating expenses. Council will continue to raise rates to ensure this practice continues.

*(Describe how the waterworks rates and fees are determined, including the types of costs used for determining the rates and fees.)*

The current water rate structure was established in April, 2010. The current water and sewer rates generate enough revenue to cover water and sewer operating expenses, some capital expenditures and, in years where there is no long term debt payments, an annual contribution of \$10,000.00 to a Water & Sewer Reserve Fund. Operating costs include staff salaries, benefits and training; electricity; natural gas; insurance; chemicals; repairs; maintenance; supplies; etc. Although there is not a specific infrastructure charge, \$10,000.00 is earmarked every year to a Water & Sewer Reserve Fund to address future capital expenditures as long as the Town is free of long term water and sewer debt. If there is long term debt, the first priority is to reduce debt and subsequently interest payments.

Below provides a snapshot of our current water rate increases. Rate increases are based on covering the cost of inflation and do not reflect the possibility of undertaking any major capital expenditures.

<b>Date</b>	<b>Quarterly Base Rate (6,000 gallon allowance)</b>	<b>Excess Charge per 1,000 gal.</b>
February 15, 2011	\$54.00	\$4.00
February 15, 2012	\$60.00	\$4.00

*(Describe the objectives of the waterworks rate policy)*

The objective of the waterworks rate policy is to ensure that the water and sewer utility continues to pay for the cost of service. The proposed rate increases will cover inflation as well as servicing fees of the long term debt. First priority is reduction of long term debt and interest charges. The next priority after all debt is retired is replenishment of the Water & Sewer Reserve Fund to help address future capital projects.

## WATERWORKS CAPITAL INVESTMENT STRATEGY

On August 16, 2011, Council passed a resolution on a capital investment strategy.

(Describe the objectives of the waterworks capital investment strategy.)

The objective of the waterworks capital investment strategy is to address anticipated waterworks infrastructure maintenance and the timely replacement of that infrastructure so that residents can continue to enjoy abundant, safe drinking water on an uninterrupted basis. When debt free, \$10,000.00 per year is set aside for future capital expenditures. If the Water and Sewer utility runs a large surplus in a particular year, that surplus is also set aside for future capital expenditures or debt retirement. Development fees of \$7,500/lot are charged on all new lots being created and set aside for further expansion of the water and sewer utility. The cost of future waterworks infrastructure replacement and expansion will need a combination of increasing water rates to further build reserves, funding from senior governments, development charges, long term borrowing and, in extreme situations, local improvement levies.

(Describe how capital plans are determined, including how they are identified and prioritized. Indicate the sources of funding for waterworks infrastructure projects.)

We just significantly upgraded our waterworks utility. The water tower was retired and larger supply pumps with a generator were installed in the water treatment plant thereby significantly boosting the water pressure and ensuring that any new development will have an adequate water supply. This project is already debt free. We have also initiated the first step to convert our water meters to radio frequency. The next significant infrastructure project we are undertaking is to replace our main sewer lift station and the sewer force main to the lagoon. This is currently being done in 2011 under the Building Canada Fund program and the federal Gas Tax Program. Because of the investment required to undertake this project, no significant water infrastructure projects will be undertaken until the lift station project has been completed. Council has dedicated the remaining lot sales from the Parcel "F" subdivision to the retirement of the debt on the lift station project. There are plans to service 20 new residential lots starting in 2011. Whether this project can be completed in 2011 remains to be seen.

The current waterworks capital plans and planned sources of funding are as follows:

Project	Planned Year of Completion	2011 Cost	Future Cost	Source of Funding
Water Meter Replacement	2015	\$10,000	\$50,000	Current utility operations
Water & Sewer Main Extensions	2012	\$100,000	\$200,000	Lot Sales & Short Term Borrowing
Replacement of Sewage Lift Station & Lagoon Force Main	2011	\$640,000	Nil	Current utility operations, reserves, BCF grant, Gas Tax program, lot sales & long term borrowing

For future waterworks capital plans, projects will be prioritized based on what is needed to ensure safe, abundant drinking water and funding available to undertake such projects.

### ANNUAL FINANCIAL OVERVIEW (of the previous calendar year)

Total 2010 water and sewer revenues (as reported in the Financial Statements) (R) - \$199,166

Total 2010 water and sewer expenditures (as reported in the Financial Statements) (includes interest paid on waterworks infrastructure loans) (E) - \$219,206

Total debt payments on waterworks infrastructure loans (D) - zero (no waterworks debt)

Comparison of water & sewer revenues to expenditures plus debt payments expressed as a ratio -  $\frac{(\$199,166)}{(\$219,206) + (\$0)} = 0.91$

If needed, an explanation of the ratio. (Examples could include reasons for variation from other years; unusual expenditures, revenues or volume; new infrastructure debt, etc.)

For 2010, water and sewer revenues covered 91 percent of the water and sewer expenditures.

Amount of 2010 water & sewer revenues transferred out of the utility – zero

Amount of 2010 supplementary funding required to cover expenditures, specifying the source of the supplementary funding – \$20,040 was transferred in from General Operations.

### RESERVES

Reserves available for waterworks capital infrastructure - \$30,000.

### ATTACHMENTS

- Available at the Town Office, at a cost of \$20.00, is the 2011 waterworks system assessment, as required under section 35 of *The Water Regulations, 2002*.
- There are no agreements for waterworks services.

**ANNUAL INFORMATION PROVIDED DIRECTLY TO THE PUBLIC  
THROUGH NEWSPAPERS, DIRECT MAILOUTS OR WEBSITES BY  
SEPTEMBER 1 OF EACH YEAR**

The following is information on the Town of Delisle's waterworks, as required under *The Municipalities Regulations*.

2010 Waterworks Financial Overview:

- Total water and sewer revenues (R) - \$199,166
- Total water and sewer expenditures (E) - \$219,206
- Total debt payments on waterworks infrastructure loans (D) - 0
- Comparison of water & sewer revenues to expenses plus debt payments expressed as a ratio -  $\frac{(\$199,166)}{(\$219,206) + (\$0)} = 0.91$ 
  - For 2010, water & sewer revenues covered 91 percent of the water & sewer expenditures.

The following additional information is available at the municipal office on the waterworks:

- the August 16, 2011 waterworks rate policy and capital investment strategy
- capital plans in place and related sources of funding for the projects
- 2010 financial overview of the waterworks
- waterworks reserves
- at a cost of \$20.00, a copy of the 2011 waterworks assessment.

(A copy of the information is to be sent to Saskatchewan Government Relations, Policy Development Branch, 1855 Victoria Avenue, Room 1540, Regina, Saskatchewan, S4P 3T2.)

Notes for Public Utility Boards

- These regulations also apply to public utility boards established under *The Municipalities Act*.
- The public utility board is responsible for compiling the required information related to the public utility and providing it to the respective municipalities.
- The municipalities are to make the public utility information available to the public at their municipal offices.
- Also, municipalities are to make available to the public at their municipal offices required waterworks information on the waterworks components that are not part of the public utility.
- The municipality must also provide the required information on the public utility and its own waterworks components directly to the public.
